

# Personal Low Flow Sampling Pump

## VAPex

This range has been designed particularly for low flow sampling of vapors and gases in working environments.

## Our Service Capabilities

- We service and calibrate all makes and models
- Factory-trained service technicians
- Fully equipped state-of-the-art calibration and service laboratory
- Certificates of calibration can be issued for quality assurance purposes
- Typical turnaround time is 2 to 3 days
- NATA traceable calibration gas used

## Our Hire Capabilities

- Same day quotations
- Customized set-up to match customer requirements
- All come with full up-to-date calibration certificates

## Air Sampling

## Personal Sampling Pumps

### Apex2

This is the latest generation of personal sampling pumps, which can now be monitored from your mobile phone or tablet.

Closed loop, wireless calibration with Apex2 pumps

## Personal Sampling Pump Calibrator

### Flow Detective

The Personal Sampling Pump Calibrator is an easy-to-use, all-in-one airflow calibrator suitable for all types of air sampling pumps and other applications for flows up to 5 L/min.

## High-Flow Sample Pump

### Vortex3

This pump is the latest generation of static, high-flow rate sampling pumps, which can now be controlled and monitored from your mobile phone or tablet.

## Real Time Dust Monitors

### Microdust Pro

The Microdust Pro is a portable device that instantly detects airborne dust, fumes, and aerosols. It provides qualitative data beyond traditional air sampling methods, making it suitable for walk-through surveys and measuring the effectiveness of control measures.

## Area and Boundary Nuisance Dust Monitor

### Dust Detective

This kit consists of a **Microdust Pro** and the **Apex2**, all housed in a rugged casing to IP65.

This real-time dust monitor is ideally suited for the measurement of particulate concentration such as dust.

Ideal for site operators who need to monitor the dust levels within their site, inside or outside, or at the boundary. It is perfect for short-term static monitoring on any site.

**Insight**

- Real-time graphical display of dust level
- Extensive range: 0.001mg/m<sup>3</sup> to 250g/m<sup>3</sup>
- Sampling for total dust, (respirable, PM2.5 or PM10 with optional adaptor)
- Long life battery- runtime up to 13 hours
- Data logging with 500 run memory
- Downloads to Insight Software for analysis and reporting
